

ChemTrack Lab

Quick User Guide for Chemical
Inventory Management

1. Initial Setup

ChemTrack Lab v2.1 5 chemicals 1 expiring

Add Inventory Expiry Checkout Reorder QR codes Setup

GOOGLE SHEETS SYNC

Apps Script web app URL
Syncs every chemical entry and checkout log row to a shared Google Sheet. Creates two tabs automatically: Chemicals and Checkout Log.

https://script.google.com/macros/s/AkfycbzTqKQ6BbAqiRyS42Gv78XSQQD95D_5x5OjaxizxCLfanLVttW1SOIRLIBcn1CAhUoYKQ/exec

GOOGLE SHEETS SETUP GUIDE

- 1 Open sheets.google.com → create a new blank spreadsheet
- 2 Go to **Extensions** → **Apps Script**
- 3 Delete any existing code → paste the script below
- 4 Click **Deploy** → **New deployment** → **Web app**
- 5 Execute as: **Me** | Who has access: **Anyone**
- 6 Copy the deployment URL → paste above → Connect

Show Apps Script code

AI LABEL READING

Anthropic API key
Powers photo-based label identification. Your key is stored in your browser only — never sent anywhere except Anthropic's API. Get one at console.anthropic.com.

Save key

EXPIRY ALERT WINDOW

Flag chemicals as "expiring soon" this many days before their expiry date.

90 days before expiry Save

Open the Setup tab.

Paste your Google Apps Script web app URL.

Click Connect to enable Google Sheets synchronization.

Optional: Add your Anthropic API key for AI label reading.

Set the expiry alert window and save settings.

2. Uploading a New Chemical

ChemTrack Lab v2.1 4 chemicals

[Add](#) [Inventory](#) [Expiry](#) [Checkout](#) [Reorder](#) [QR codes](#) [Setup](#)

✓ Done! Review the fields below and fill in anything missing.

[Identify with AI](#) [Clear photos](#)

Chemical name *
Povidone-Iodine (그린 포비돈 요오드 액)

Company / manufacturer
Green Pharmaceutical (그린제약)

Catalog number
261

CAS number
e.g., 64-17-5

Lot / batch number
602137

Amount / size
1L

Number of stocks
1

Storage location
e.g. Fridge A, Shelf 2

Arrival date
2026-05-07

Expiry date
2019-11-16

Last order date
연도-월-일

Order frequency
Unknown

Notes / hazard codes / purity / grade
저자극성 살균치료제 (Low-irritation antiseptic), 일반의약품 (OTC drug), www.greenpharmaceutical.co.kr, DOYUNLEE LAB

☐ Already opened

[Clear form](#) [Save chemical](#)

Upload photos of the bottle or label.

Use 'Identify with AI' to auto-fill chemical information.

Review and complete missing fields manually.

Save the chemical to add it into inventory.

View all registered chemicals in one searchable table.

Search by name, CAS number, catalog number, or location.

Monitor stock status, expiry dates, and opened bottles.

Export inventory data as CSV when needed.

4. Viewing Detailed Information

The screenshot displays the ChemTrack Lab v2.1 interface. At the top, a navigation bar includes links for Add, Inventory, Expiry, Checkout, Reorder, QR codes, and Setup. Below this, a summary bar shows 5 chemicals, 3 opened, 1 expiry alert, and 5 low stock items. A modal window titled 'Saccharose [D(+)-Sucrose]' is open, showing details for a chemical. The modal includes tabs for 'Opened' and 'Low stock', and sections for 'DATASHEETS & SDS' (with links to PubChem, SDS, and ECHA), 'CHEMICAL DETAILS' (with fields for Company, Catalog #, CAS, Lot / Batch, Amount, Stocks, Arrival, Expiry, and Open date), and 'NOTES' (with a text area containing 'KKang lab'). At the bottom of the modal are buttons for 'QR code', 'Edit', and 'Delete'. The background interface shows a list of chemicals, including Saccharose [D(+)-Sucrose], Sulfurhodamine 101, 1,10-Phenanthroline hydrochloride monohydrate, Ethylene glycol, and Povidone-Iodine (그린 포비돈 요오드 액).

Open any inventory item to view detailed information.

Access PubChem, SDS, and ECHA references directly.

Check stock count, lot number, and expiry information.

Generate QR codes or edit entries from the detail window.

5. Duplicate Detection

× Clear form Save chemical

Possible duplicate detected
A chemical with a similar name already exists.

Sulforhodamine 101 Opened

Company: **Sigma-Aldrich** Catalog: **S7635-100MG**
CAS: **60311-02-6** Lot: **SHBM1482**
Amount: **100MG** Stocks: **1**
Location: **C211 shelf**

Edit View in inventory

Is this a new stock of an existing chemical, or a genuinely different one?

× Cancel — go back + Add stock to existing

Save as new entry anyway

The system detects similar chemicals automatically.

Choose whether the entry is a new stock or a separate chemical.

Add stock to existing inventory to prevent duplicate records.

Continue as a new entry only when appropriate.

Recommended Workflow

1. Configure Google Sheets synchronization in Setup.
2. Add chemicals using AI-assisted label recognition.
3. Review duplicate warnings carefully before saving.
4. Track expiry dates and stock levels from Inventory.
5. Use detailed views and QR codes for fast access.
